Northern Region

Region One Launches New Fire Prevention Program

*Brian Ratzburg, Steve Johnson, Smokey Bear,
Dan Akins, and Lisa McLeod*

Smokey Bear has found some new friends and supporters of his fire-prevention program, and will soon be seen on a new poster with them. Four student athletes from universities in the Northern Region posed with Smokey on May 25 for the poster.

This is a first, not only for Region One, but service-wide. John Pritchard, Regional fire prevention specialist, said the concept of combining Smokey with famous athletes to increase public

appeal and recognition of fire prevention messages originated in California a few years ago. The program, called "Smokey and the Stars," was extremely popular. Posters of various sizes and

baseball cards were widely distributed. Pritchard said, "The idea of a poster featuring college athletes with Smokey originated in 1986, but until just recently, NCAA rules prohibited student athletes from supporting public service work." That ruling was changed this winter, clearing the way, and making Pritchard's poster idea possible.

To launch the program this year, each Forest in the Region contributed a portion of their fire funds. The Forest Service identified the sport to be represented by each university, and the university selected the athlete. The first edition of the poster will feature Steve Johnson, hockey player from the University of North Dakota, Dan Akins, basketball player from the University of Idaho, Brian Ratzburg, football player from Montana State University and Lisa McLeod, basketball player from the University of Montana. As soon as the posters are printed, they will be distributed to all Forest Service offices in the Region.

"If this pilot program proves effective and feasible," said Pritchard, "it will likely be continued in the Region."

Lolo National Forest

National Primitive Skills Award

Two shiny chrome-plated, double-bit saddle axes were presented June 6 at a ceremony honoring winners of the annual National Primitive Skills Award. Seeley Lake District's bridge crew won the award for using primitive and historic skills in rebuilding a long-span bridge across the North Fork of the Blackfoot River in the Scapegoat Wilderness.

Although the winner was announced some time ago, formal award presentation took place just recently at the Lolo NF Supervisor's Office. Deputy Chief Jim Overbay represented Chief F. Dale Robertson at the ceremony. He presented the National award to Forest Supervisor Orville Daniels, while the Regional award was presented to Seeley Lake Ranger Dennis Johnson by Bill Worf, originator of the award. Worf, retired Director of Recreation, Wilderness and Lands, R.O., initiated the award in 1977 to recognize and perpetuate primitive skills.

"I feel really honored in accepting this award," said Daniels. "The Seeley Lake crew proved that in a world that's going high-tech we can still maintain our wilderness skills. They used the same tools that were used in building bridges 50 years ago."

Most members of the Seeley Lake bridge crew were at the special ceremony. Deputy Regional Forester John Hughes presented each with a belt buckle designed by Worf for winners of the annual award. Crew members included Dave Schilz, Jerry Printz, Joe Foster, Tony Drahos, Rick Reynolds, Rob Holden, Shayne Flinders, John Heffernan and Keith Schultz. Randy Borniger, Ernie Lundberg and Dean Solheim horse-packed materials to the wilderness site; Borniger and Lundberg completed cleanup and rehabilitation work after the construction.

Dennis Johnson, Seeley Lake District Ranger, also credited project engineer Kirk Thompson, forestry tech Jim Blackburn, and resource assistant Jim De Herrera for designing and overall supervision. "This support made the actual construction go smoothly," said Johnson.

Deputy Chief Jim Overbay, Lolo Forest Supervisor Orville Daniels, retired Director of Recreation, Wilderness and Lands, Bill Worf, and Seeley Lake Ranger, Dennis Johnson.

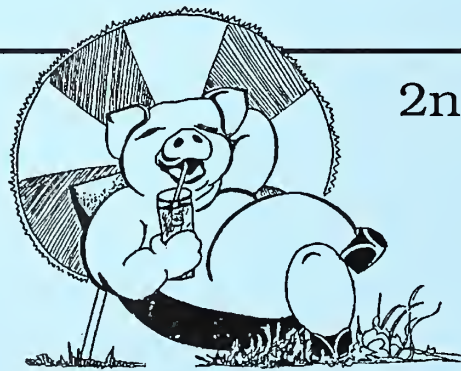

Northern Region

Region-Wide "Pignic"

Saturday, July 16 is the date of the second annual Regional Picnic. Seeley Lake Ranger Station is hosting the event, and all Region One employees and retirees are encouraged to come and enjoy the fun.

Planned activities start at 1:00 p.m., the potluck at 4:00. Fun will include boating, canoeing, swimming, special events for kids and adults, and a volleyball tournament. Contact Seeley Lake Ranger District if you have a volleyball team. Bring your boats, canoes, rafts, inner tubes, etc. Come early, stay late; bring the family and enjoy the day! It would be a good idea to pack warm jackets as evenings are often cool.

The potluck features a pig to be roasted on-site! Drinks and table service will be provided; you need bring only a potluck side-dish and your appetite.

2nd ANNUAL PIGNIC '88

*Seeley
Lake*

The cost of this event is \$4.00 for adults and \$2.00 for children under 12. T-shirts will be on sale for \$6.00 each. Picnic planners need to know how many to plan for, so your RSVP by July 11 to one of the following people will help:

Lolo NF, Colleen Finneman	FTS 585-3764
Seeley Lake RD, Dolly Hill	406-677-2233
Regional Office, Cathy Thompson	FTS 585-3575
Advance payment will be appreciated!!!	

New State Forester in North Dakota

Larry Kotchman, North Dakota
State Forester

Larry Kotchman of Walhalla, North Dakota, was recently selected as State Forester for the State of North Dakota. Kotchman has been Acting State Forester for the past two years.

Kotchman gained a great deal of respect for his work as Acting State Forester. He initiated a high quality Statewide forest insect and disease survey. Under his direction, an aggressive program for assisting rural fire districts improved their firefighting capabilities, and considerable progress was made to slow the spread of Dutch elm disease and market diseased trees. He significantly revised the State Forest Resource Plan, accelerated the agency's information and education efforts, and initiated a reorganization of the agency.

Kotchman has an associate degree in forestry from North Dakota State University and a bachelor's degree in forestry from the University of Minnesota. He was Asst. Area Forester for Wisconsin Dept. of Natural Resources from 1972-75, and Northeast District Forester for the North Dakota Forest Service from 1975-86.

Glenn Roloff, TCFPM in the Regional Office, and a member of the search committee that made the recommendations for the selection, said "we're fortunate to have a man of Kotchman's ability in this key position." Roloff explained that the Forest Service provides over one-quarter million dollars each year on a cost/share basis with the North Dakota Forest Service for conducting State and private forestry programs throughout the State.

Other members of the search committee were Dr. Art Boe (Chairman), N.D. State University; Bruce Wight, USDA Soil Conservation Service; Gary Puppe, N.D. Assn. of Soil Conservation Districts; and Roy Lafromboise, N.D. Forest Service. Dr. Robert Koob, Acting President of North Dakota State University, made the final selection, which was then approved by the North Dakota State Board of Higher Education.

Helena and Beaverhead National Forests

Adopt A District

by Ed Levert, District Ranger, Wise River Ranger District

You've heard of "adopt a trail" and "adopt a horse," but have you ever heard of "adopt a district"? An apparent first, the Lincoln District of the Helena NF and the Wise River District of the Beaverhead NF have adopted each other as a means to share ideas. On April 13 all Wise River District personnel loaded up and traveled to Lincoln. The following day the two Districts shared information on current programs, then broke into smaller groups and compared individual jobs. This exchange showed that similar jobs are often done in different ways.

The idea for this joint meeting originated at the 1987 Ranger Seminar when Ron Desjardins and Ed Levert were discussing the different ways we do business. During the Lincoln visit the idea of having a sister district was discussed, and it was decided to maintain close relationships by reciprocal visits and exchanging current information. The exchange has been mutually beneficial and the idea is being forwarded to the "Discovery Proposal" committee of the Helena Forest, a committee charged with addressing new ideas.

Custer National Forest

Environmental Ed Program Expands

"No-Trace Camping" is a familiar term to students in the Billings area. For the past nine years sixth graders in Billings and nearby towns have been participating in classes taught by employees of Beartooth Ranger District. Tom Alt, forestry technician, began teaching the classes nine years ago, and was joined last year by wilderness ranger Blase DiLulo. Blase taught Junior High biology and earth science until his retirement in 1985, spending summers as a wilderness ranger on the Beartooth District for the past 15 years.

This year the two launched a new class to complement "No-Trace Camping" called "Bear Us In Mind" - a class preparing campers and hikers for ventures into grizzly bear country.

In March, DiLulo and Alt presented their "No-Trace Camping" program to 2,386 sixth graders in a twelve-day period. The following two weeks they presented their new grizzly bear program to 1,667 seventh grade students. Over the nine-year period over 25,000 students in a three-county area have heard the messages these two educators are promoting.

For a copy of lesson plans or any other information on these very valuable and successful programs, contact Tom Alt on the Beartooth Ranger District.

Moose Creek Kudos

by Shelley Dumas, Moose Creek Ranger District

Nez Perce NF string players, Charlie Brown, Amos, Archie, Arabella, OJ and Buckshot, led by Buck and Ian Barlow, wowed the crowd at the annual Dogwood Festival Parade in Lewiston on May 7th. They walked away with the People's Choice trophy ribbon for best parade entry. The "short" string of Moose Creek pack mules displayed their best mule manners while thrilling the hundreds of sidewalk spectators with their precision circling and serpentine drills along the parade route from Clarkston to Lewiston.

The event was a "first" for Moose Creek, and District Ranger Dennis Dailey said he would like to see more Forest Service involvement in the future demonstrating traditional packing skills as practiced within the modern-day Forest Service. "Judging by the positive reaction of the Dogwood Festival parade-goers, we're on to a good thing" said Dailey. He also had high praise for Moose Creek packer Ian Barlow's expertise and showmanship.

In addition to the parade success, Barlow and his long-eared crew participated in the first inter-Forest Service obstacle course and packing competitions as part of the 4th annual Snake River Mule and Donkey Show. Of the nine teams competing, they won the packing division. For all you Forest Service wranglers....the Challenge is out for 1989!

Ian Barlow on "Buck" leading Moose Creek mules during Dogwood Festival Parade in Lewiston, May 7. Historic Lewis and Clark Hotel in background.

Missoula Technology and Development Center

Art Jukkala Gets Award

Many firefighters owe their lives to Art Jukkala and his fellow workers at the Missoula Technology and Development Center (MTDC). Jukkala devised the aluminum foil pup tent, known as an emergency fire shelter, which is now required equipment for all Forest Service firefighters.

Jukkala is program leader for Fire & Aviation Management and Safety at Missoula Technology & Development Center. He was recently awarded the 1988 Federal Laboratory Consortium National Award for excellence in technology development and transfer. Al West, Deputy Chief of the Forest Service, said Jukkala was honored for his superior performance in

Art Jukkala

developing safety systems and materials for wildland firefighters.

Jukkala said, "This award is really in recognition of a team effort by a number of people at the Missoula Center, including Ted Putnam, Bob Hensler, Jim Kautz and Ron Gaumer." "They all deserve equal credit for implementing fire shelter use throughout the wildfire suppression community," he said, "I consider this a team award in recognition of the work of all these people at the Missoula Center."

Lee Northcutt, manager of MTDC, says it is estimated the Forest Service fire shelters that Jukkala has worked with have saved the lives of more than 200 wildland firefighters."

Jukkala received the award at a special ceremony May 17 in Washington, D.C.

Clearwater National Forest

Forests Are More Than Trees

by Elayne Murphy, Public Affairs Specialist

Employees on the Clearwater NF went to extremes to show that "Forests Are More Than Trees" during National Wildlife Week. They created a display for the Supervisor's Office featuring a 7 x 6 point full mount bull elk as the centerpiece. Mounts of other forest inhabitants like the raccoon, great horned owl, and osprey surrounded the elk along with appropriate Forest vegetation.

Dan Davis, wildlife biologist at the Supervisor's Office, spearheaded creation of the display. Gail Frazier and Diana Jones, both from the Supervisor's Office assisted, and Norm Norton, Lochsa Ranger District, was the taxidermist.

The display has been popular, drawing many visitors. It is also well traveled, having appeared at the Rocky Mountain Elk Foundation banquet in Lewiston, the University of Idaho in Moscow, and the Regional Leadership Conference in Billings.

News Briefs

Old Photos Needed....

by Kirby Matthew

Have you, sometime in the past, worked at the East Fork Guard Station on the Bitterroot NF? If so, archeologist Kirby Matthew would like to hear from you. Planning has begun for restoration of the East Fork site, and information and old photographs of the buildings would be of great help.

A cabin built at this site in 1912 served as a Ranger Station until the mid-1930's. It continued to be used as a seasonal guard station through the 1960's, and is now on the cabin rental program from November to March of each year.

Stabilization of the cabin will be done during July, followed by restoration sometime later. If you have information or photos, or know of someone who does, please contact Kirby Matthew at the Bitterroot NF Supervisor's Office (406) 363-3131.

Fire Lookout Artifacts On Display....

For an interesting trip this summer, you may want to consider a visit to Heavens Gate Lookout on the Nezperce NF. Ray Kresek, author of "Fire Lookouts of Oregon & Washington" and "Fire Lookouts of The Northwest", will be spending his first summer of retirement from a 34-year firefighting career on the lookout. He'll have on display many early lookout artifacts, including a 1915 heliograph, 1925 phone, 1935 lookout radio, and the earliest Osborn Firefinder. Kresek expects nearly 50 tourists daily at the lookout, which is located in Hells Canyon National Recreation Area, southwest of Riggins, Idaho.

New Video....

"Desired future condition" is a phrase rapidly being ingrained into our terminology. A video with the same name has been distributed to all R-1 Forests. It explains what desired future condition is and how it is being applied. The program features Gloria Flora, District Ranger of the Selway District, Nez Perce NF. It was produced by Doug Glevanik, PP&B, Gloria Flora, and Gene Colling, IO. Graphics were provided by John Alley, Deerlodge NF.

Nez Perce National Forest

Nez Perce Employees Get Health Evaluation

by Marci Gerhardt, Quality of Worklife/FWP Co-manager

This spring, 60 Nez Perce NF employees participated in the University of Idaho Health Risk Evaluation. The tests were sponsored by the Quality of Worklife/Federal Women's Program with David Hayes of the Clearwater Ranger District responsible for coordination. The University of Idaho was awarded the contract on a competitive basis. The first testing was available only to permanent employees and was limited to just a few from each unit. Later it was available to all employees and spouses.

A wide range of tests were given to each employee, including electrocardiogram, blood pressure, flexibility, muscular endurance, pulmonary capacity, percent body fat, stress, height and weight, and triglyceride/cholesterol blood tests. A nutrition analysis was available. After tests were completed, the participants met as a group and discussed results.

All participants were enthusiastic about the Health Risk Evaluation. It gave them a general idea of how healthy they were and showed where they could improve. The evaluation will give the Nez Perce's health and wellness group some topics to focus on for the Forest's wellness program.

Rocky Mountain Ranger District Hosts Field Day

by Jane Schmoyer-Weber, Public Information Officer

Carol King, forestry tech, "tick-proofs" students before class

Sixty two fifth grade students from the Choteau, Fairfield, and Augusta elementary schools enjoyed an outdoor classroom day, thanks to Rocky Mountain Ranger District employees.

The students were bussed to Sun Canyon where they climbed hills and hopped across streams while learning about resource management. They rotated through five learning stations. Range technician Brad McBratney taught grass identification and range readiness measuring techniques. Stu Buchanan, wildlife biologist, discussed the Forest's role in providing wildlife habitat. Forestry tech Carol King and wilderness ranger Ray

Mills constructed a campsite and taught minimum impact camping techniques. Chuck Frey, Forest geologist, gave a lesson in geology, and forester Tim Love introduced the students to forest ecology in an old growth stand. Several other District employees ushered the fifth graders from station to station.

This first student field day was a big success by the student's standards as well as the District's, and a repeat is in the plans for next year.

Geologist Chuck Frey explains geologic formations.
Ann Arensmeyer, clerk-typist, watches with students.

In Memoriam

HANS ROFFLER, Region One employee for 34 years, died January 30 in Mesa, Arizona. Roffler, who held a forestry degree from the University of Montana, did seasonal work for the Forest Service from 1933 until his first permanent appointment in 1936. He served as a forester on the Bitterroot, Kootenai and Clearwater National Forests. After three years on the Lochsa Ranger District, Clearwater NF, he was promoted to District Ranger on the Red River and Selway Districts of the Nezperce NF. He served on the timber management staff on the Coeur d'Alene NF from 1947 to 1956, then transferred to State & Private Forestry in the Regional Office, where he worked until his retirement in 1966. After retirement he taught forestry courses at Missoula Technical Institute and Flathead Community College, and did forestry consulting.

WARREN "CHUCK" PETERSON, a lifetime resident of Sandpoint, Idaho, died June 2 in Spokane at age 63. Peterson worked for the Forest Service in engineering for 33 years, beginning in 1939 at age 17, until his retirement in 1972.

SIMON LAWRENCE "BUCK" CUSKELLY, died June 13. Prior to his July 1973 retirement, Buck had worked on the Salmon NF, in the Washington Office, and as Asst. Regional Forester of Soil and Water Mgmt. in the Intermountain Regional Office.
